

Use scenario 1

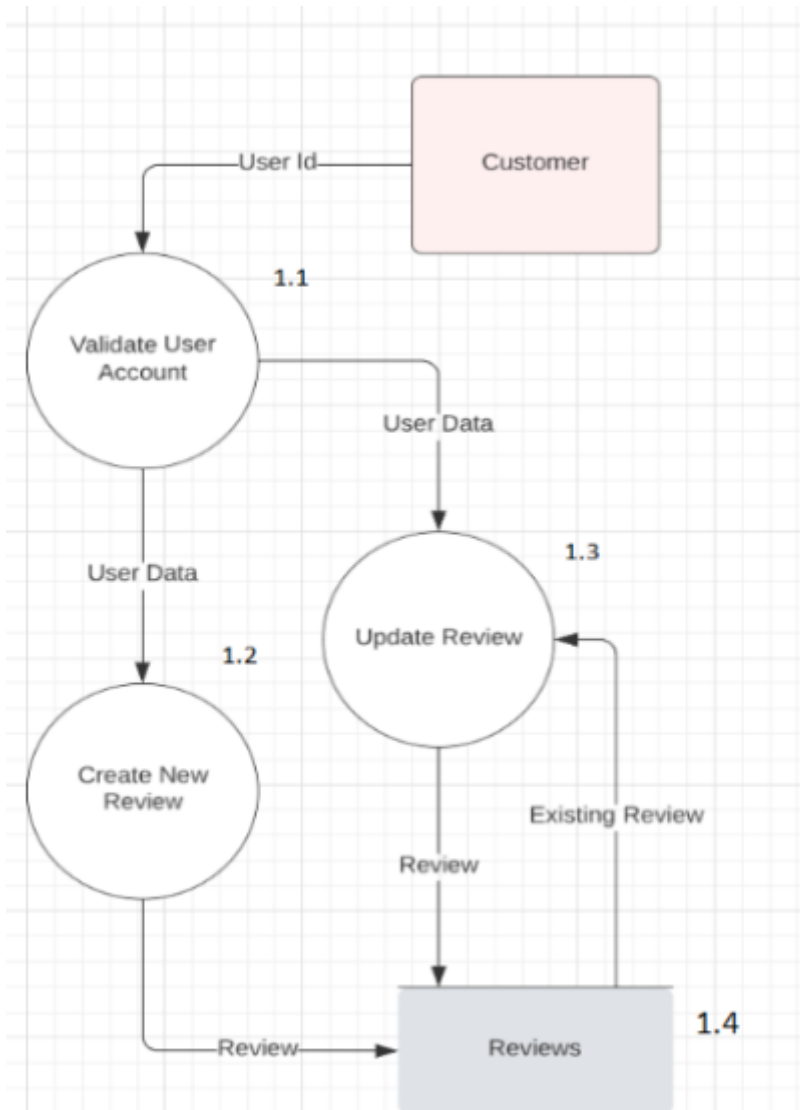

User Scenario Level1 DFD Customer searches and orders one item

User has some idea of what they want and it will only look for the item

- 1.Customer inputs username and password to log-in(fig 1.1)
- 2.Customer fills a search query, chooses an item(fig 1.2)
- 3.Customer places a product order that is sent to the shipping provider(fig 1.3)

Use scenario 2

User Scenario Level1 DFD User receives their product and would like to leave a review about the product and the website

1. User first must have created an account and be logged in to leave a review of a product. (fig 1.1)
2. User will already have idea on what to review based on what they have ordered and then can leave a review of that item. (fig 1.2)
3. After leaving a review the user can also look at other reviews other users have left to help with their shopping experience. (fig 1.4)
4. If the user chooses to, they may also change their already existing review if they so please(fig 1.3)
